

QUALITY/ REGULATORY ENGINEER

LAUSANNE, SWITZERLAND

Are you sick of working for a slow moving big company? Or fed up of the financial risk and uncertainty of working for a startup? We have a great opportunity for you!

This is a company with a unique history. It has a spirit of a startup, the revenue of a mid sized company and the security of a global company!

This means the chance to work in a secure environment, with an excellent culture of quality, where you can have (and see!) the direct impact of your work.

This company manufactures the best products in their specialised area of medical devices, and have major distribution channels and key partnerships globally. With significant investment in new product development projects, they have a full pipeline and are growing at a very fast pace.

In this newly created role you will cover both quality and regulatory activities for a wide portfolio of devices. In this position you will work on product development projects from cradle to grave and become the “go-to” person post product launch for your own portfolio of devices.

This is a fantastic opportunity for someone who is tired of the politics in a corporate environment and looking for a stable position that is fast-paced, hands on and full of personal & professional development opportunities.

AS QUALITY/REGULATORY ENGINEER YOU WILL:

- Support the full 360° cycle of new product development projects for new product launches
- Collaborate with cross functional departments such as Marketing, R&D, Quality, Technical and Regulatory
- Execute quality and regulatory strategy for new product launches
- Ensure compliance according to local regulations for new product registrations and maintain existing registrations
- Be the technical expert for the portfolio of products
- Participate in internal audits

ARE YOU?

- A professional with 3+ years experience in a quality OR regulatory function in the medical device industry?
- Holding a bachelor's, master's or post-graduate degree in engineering?
- Working experience in at least one project that led to CE marking?
- A positive, open-minded person with the curiosity to develop and be hands on?

We'd love to hear from you! Please send your CV to elena@elemed.eu to arrange a confidential career discussion.
