

# Quality Assurance Manager

## *Zurich region*

### The company

Join a well established, growing company designing, developing and producing a Class III active implantable medical device that changes the lives of patients.

To further support the growth of their Quality division, our client has released an exciting position for a Quality Assurance Manager.

This is a great opportunity to join a close knit team with one vision, surrounded by other senior experts in their field.

You can be sure that no two days will be the same! You'll enjoy a wide variety of responsibilities covering various elements of Quality Assurance.

This company also understands the importance of work/life balance and in light of this are open to this position being part-time.

### As the Quality Assurance Manager your responsibilities will include but not be limited to:

- Management of all QA activities and equipment management of QA tools in production.
- Responsible for incoming inspections, inclusive of quality control inspections.
- Responsible for the approval and release of products with respect to quality assurance.
- The key expert for environmental monitoring and data filing.
- You will prepare and deliver respective KPIs and management reports.
- Support the coordination of returned material for complaint handling.
- Support all training activities; while also receiving great training especially in the area of Health and Safety.

## Requirements

- 3+ years of experience in quality assurance.
- Experience and/or exposure to active medical devices. We will also accept applications from experts who have expertise in medical devices of higher risk products.
- Experience of working within the quality assurance of production of medical devices, with a key understanding of ISO 13485.
- Previous health and safety experience is a plus.
- Managerial experience or project management experience is an advantage.
- Excellent communication skills in English.
