

Head of Quality Management Systems

Work from home in Europe!

Are you motivated by lean processes, fast moving decisions and the prospect of building something new? This exciting high-growth start-up offers you just that!

Join a well funded startup company, backed by a global leader in the healthcare industry and be part of building something from the ground up. If you're a quality system manager with experience building a Quality Management System from scratch, the ability to design lean processes and strong stakeholder management skills, read on.

In this role as Head of Quality Systems, you'll be responsible for

- Building out a new, efficient and effective Quality Management system
- Designing "best in class" lean company processes in line with regulatory guidelines and defending those processes in external audits by regulators
- Optimizing and digitizing workflows
- Taking a pragmatic approach to ensure company policies and global SOPs adhere to regulatory guidelines
- Implementing lean management principles within company processes and continually evaluating effectiveness and opportunities for improvement- Leading process efficiency assessments, conducting quality reviews to ensure effective critical assessment of company solutions against statutory, business and customer requirements
- Supporting general company quality
- improvement and remediation initiatives

If you're somebody who thinks in pragmatic solutions rather than restrictions, if you are ambitious, motivated and have the ability to apply critical thinking to challenge the norm, we want to hear from you! This is a fast growing company and this role offers great leadership career progression .

We are looking for forward thinking quality managers who can demonstrate competence in all 5 areas described below:

- 1.Experience working in a startup environment and building a QMS from the ground up, in a highly regulated industry.
- 2.Experience applying lean principles to (re)engineer company processes
- 3.Fluency in English
- 4.A technical/scientific university degree
- 5.Experience optimising and digitising IT workflows.
