

# Supplier Quality Manager

Sweden or home-based in Europe

**kristina@elemed.eu**

Are you an expert in Supplier Quality for medical devices? Do you want to define and shape not only new quality processes but also your own role? Are you tired of working in slow moving corporations where you can't make an impact? Read on!

## The company

This company has been enhancing performance in healthcare across the world for over 150 years so have a huge amount of history behind it including being the first company to mass-produce dressings for wound care. Even though they have developed and manufactured many revolutionary devices, the innovation doesn't stop and is done in-house!

They are always looking for new ways to improve not just in what they produce but also in how they do business so have recently undergone a huge business transformation.

The value of work-life balance is strongly recognised here so this opportunity is open to be based from home anywhere in Europe. If you are looking for a large, established company that still feels like family, this is the place for you!

## The opportunity

Due to a recent transformation in the business, this new position in Commercial Quality was created and we are looking for you! If you're ready for a step into fresh shoes where you can mould and shape them to fit you, this is the position for you. This is an opportunity to define and implement new processes for the suppliers and distributors of the business whilst training and supporting the development/upskilling of the existing commercial quality team. You will be liaising with international teams and influencing stakeholders to close the gaps in the process. It's not often that you have the opportunity to transform and influence quality in such a large, established organisation...

## The role

As Supplier Quality Manager you will (not an exhaustive list):

- Lead and develop the processes for selecting, onboarding, approving and monitoring suppliers aiming to deliver sustainable performance
- Collaborate with the quality team in the commercial organisation to implement, maintain and continually improve all processes linked to suppliers
- Drive continuous improvement activities for indirect procurement and distribution and interface with key stakeholders and corporate functions to drive process improvements
- Ensure effective agreements are in place with distributors/sales agents compliant with the relevant requirements and that the suppliers consistently distribute products in compliance with the relevant requirements
- Manage supplier audits
- Proactively drive changes, develop and improve the existing quality system requirements for distribution and indirect procurement
- Lead, follow up and action complaints, CAPA and audit findings related to suppliers

## Your qualifications

- 4+ years of quality assurance experience in the medical device industry relating to suppliers or distributors
- Experience with supplier audits
- Willingness to travel occasionally to Sweden
- Eligibility to live and work in Europe
