The opportunity

Does innovation and driving forward product development mean something for you?

How about the chance to create the key strategy and drive forward product development for a globally leading company?

This role is all about the opportunity to work with the senior management and board members to develop the company's consistent growth and passion for innovation. With the end consumer at the forefront of this company's strategy, they are looking to hire a Senior director within product development who can drive forward key strategy to ensure the product is always meeting the ever changing demands of the consumer. Report directly into the CTO and work closely with the CEO of this business to bring forward your ideas and develop teams across R&D and V&V. Your voice will be heard and you will have key accountability over this exciting division.

The company is headquartered in Switzerland, with key market share globally. You will have influence over the team in Switzerland which encompasses around twenty members, with key strategic links to the US office. A great global role for someone who enjoys managing teams and driving forward strategy globally.

The opportunity

In your role as Senior Director of Product development you will (this is not an exhaustive list):

- Lead the engineering function within the business which will encompass R&D, new product development and verification and validation
- Be the leading hand in driving the strategy for both mechanical and electronic engineering
- Provide executive leadership with regards to all matters concerning new product development and R&D with both internal and external stakeholders
- Build and support the CTO in creating product development roadmaps to ensure the business is innovating and meeting consumer needs with the evolution of the market
- Ensure quality and compliance demands are met
- Manage a team of around twenty members, inclusive of managers and engineers
- Mitigate risks and regulatory issues concerning current and future projects concerning new product development
- Working alongside the CEO and CTO to develop key strategy for the engineering division

Expectations

- 10+ years experience within product development for medical devices, ideally electronic medical devices. We will also open profiles of those from strong product development background who have worked in other highly regulated industries, such as automotive
- 5+ years managing teams and developing strategy
- True “leadership” skills. Ability to influence indirectly, winner of hearts and minds
- Commercial understanding of the impact of Regulatory/Quality
- Excellent communication skills in English

This is a key leadership role not to miss and can provide the right candidate with the platform to develop their career globally.
