GENEVA, SWITZERLAND

Quality Assurance Engineer

MONIA@ELEMED.EU

elemed

The company

Are you looking to work with challenging and innovative products that will address some of the biggest challenges in Neuroscience? Are you passionate about Quality Assurance? Then keep reading, you are going to like this opportunity!

This position will give you the chance to be part of some wonderful exciting projects, surrounded by bright minds from all over the world.

You will be able to develop your technical skills in software, AI, and Cyber security with the support of a QA team (2 people) with more than 20 years of experience combined in medical devices including active implants.

This is a real intellectual challenge! Indeed, you will help neuroscientists to deliver projects that will advance our understanding of the brain and will interact with the research team! So don't wait to be part of this cutting-edge technology!

eleMed

Your responsibilities

You will work both collaboratively and independently to facilitate the development of advanced implantable neuro devices.

- Act as Quality Assurance Project leader for some projects, including support for design reviews

- Be responsible for quality assurance activities to support and maintain the Quality Management System

- Ensure effective design change control activities during the product life cycle

- Support projects and Quality Management System related nonconformities and Corrective and Preventive Actions (CAPAs)

- Conduct and support key supplier audits

eleMed

Qualifications

- MS in Engineering or relevant Life Science discipline, with 3 years of experience in a similar position in the medical device industry

- Experience with maintenance of Quality Management Systems and Processes for Medical Devices

- Exposure to IEC 62304 Software Lifecycle process standard requirements

- Fluent in English
