### The Company

Do you want to be wowed by a Quality Design lead opportunity? Are you looking for a challenging role in a unique environment? If yes, you could join a multicultural team of quality experts in a medical device world leader in this exciting, cutting-edge role. Sitting alongside their innovation centre, you will work with state-of-the-art medical devices, benefit from excellent training, and make a difference in the lives of millions of people across the world.

You won't need to have any concerns about the future and stability of this company as they have had good performance in the market for years and are experiencing long-term growth!

This position will give you the chance to join a collaborative and knowledgeable team where you will work with interesting products such as innovative robots!

## The opportunity

Under the responsibility of the Quality Assurance & Regulatory Affairs Manager and in close collaboration with the other team members and the R&D team, the Quality Design Lead implements the necessary actions to ensure the compliance of the company's activities, as well as with any reference system retained as necessary for the company's development.

You will manage a team of 5 direct reports where you will provide support for each employee in terms of daily activities, technical skills development, and personal skills and personal development!

As a Quality Design Lead you will develop a business strategy to cover future needs.

## As the Quality Design Lead you will:

- Guarantee the conformity of the development of the products according to the applicable documents
- Implement and ensure the application of various procedures and quality methodologies
- Actively participate in the realisation of product risk analysis as well as the associated support process
- Review and approve test protocols and reports required for verification and validation of the product
- Collaborate with the various departments of the company to ensure compliance with the requirements, needs, and expectations of customers
- Participate in the improvement process of the Quality System
- Be the quality representative for R&D for products under development
- Promote the Quality spirit within R&D and develop the Quality spirit within the company
- Be a force of proposal within the R&D team

## Required experience

- Similar experience within the Medical Devices industry
- Minimum of 3 years experience as a Manager
- Fluent in French and English
