

eLeMed

PARIS, FRANCE

Quality Assurance Director

MONIA@ELEMED.EU

The company

Are you passionate about innovative products?
Would you like to be part of something that will
save lives?

Then this is the company for you! They are the
pioneers in the development of cutting-edge
pacemaker solutions. This French startup is
developing a pacemaker that incorporates a
revolutionary energy harvesting module capable of
powering the device with no energy life limitation.

It's a wonderful chance to be part of the journey and
have a huge part in the revolution this company is
creating. What more? They are located in
cosmopolitan Paris!

The opportunity

This is your chance to work with implantable devices Class III in the cardiovascular industry and be part of something that will have a real impact on the medical device industry.

You will be working closely with the engineers to develop these products. This will also allow you the opportunity to follow all the processes from A to Z and have your word and exert your influence.

So if you like to create things and be responsible for your own department, this position is perfect for you!

Your responsibilities

As a Quality Assurance Director you will:

- Define the strategy and appropriate plans for quality assurance
- Implement, maintain, and continuously improve the quality management system and assure its conformance to ISO13485
- Develop and train employees on the quality system requirements as needed
- Work with regulatory affairs to prepare MDR certification
- Management of the Risk Management File including Usability and application of the applicable technical standards for risk reduction
- Promote a quality culture across the company
- Quality/Regulatory review of technical reports
- Define criteria for a potential external eQMS version

Qualifications

- Minimum of 10 years experience in Quality Assurance within Medical Devices
- Experience in a QMS leading function or in multiple areas of QMS
- Fluent in English and French
